

I am submitting comment to the proposed 5 Mhz band. Please reserve the lower 50 khz of the band for narrow-band modes, CW and digital modes less than 500 KHz wide. It is no longer adequate to divide the band by mode only because of wide band digital modes up to 2.5 Khz. Do not allow automatically controlled stations in the narrow-band mode segment because of increased interference to manned stations. Amateur Operator W1CG.
